COHRED:

- International NGO, based in Geneva - in the process of decentralisation
- Formed in 1993 by the Commission on Health Research for Development
- Working to enable low & middle income countries to strengthen National “Research for Health” Systems

Available from: www.cohred.org
National Health Research Management Information System

www.healthresearchweb.org
What is HRWeb?

Health Research Web (**HRWeb**) is a web-based, interactive platform aimed at improving health, equity and development through research. **HRWeb** is particularly aimed at research focusing on improving health in low and middle income countries and populations, but it will be useful to high income countries as well.
Why HRWeb?

• Allow policy makers to have adequate and timely information to improve health;

• Reduce health inequity and stimulate social and economic development has been hesitant;

• Maximize National authorities access to a practical information and evidence;

• Support their decisions in designing national policies and strategies.
HRWeb Concept

HRWeb is organized to provide integrated information on research for health at country and regional levels. Its organizing principle is national health research systems. It aims to strengthen national health research capability to produce research that is excellent and relevant. Through several consultations with stakeholders from different constituencies HRWeb formed its main sections:

- Governance and Policies
- National Priorities
- Key Institutions/Networks
- Ethics Review of Health Research
- Research Financing and Partnerships
- Health Research Projects and Publications
- Information Resources
Policy Documents

- Guide Technique pour la Surveillance Intégrée de la Maladie et la Riposte (SIMR) au Sénégal
  Direction de la Prévention Médicale, Ministère de la Santé et de la Prévention Médicale, République du Sénégal, 2006 - (pdf, 5376 KB)

- Loi n° 2004-21 du 21 juillet 2004, portant organisation des activités statistiques
  Présidence de la République, République du Sénégal - (pdf, 86.75 KB)

  Ministère de la Santé, République du Sénégal - (pdf, 72.82 KB)

- Arrêté ministériel n° 1422 MS-DERF-DER du 2 mars 2001 portant création et organisation du Conseil National de la Recherche en Santé - CNRS
  Ministère de la Santé, République du Sénégal - (pdf, 10.92 KB)

- Programme National de Recherche en Santé (PNRS)
  Ministère de la Santé et de la Prevention, Direction des Etudes, de la Recherche et de la Formation, 2001

- Loi n° 2009-17 portant Code d’Éthique pour la Recherche en Santé
  Président de la République, Premier Ministre, Dakar, 9 Mars 2009 - (pdf, 169.89 KB)

- Décret n° 75-586 du 5 juin 1975 portant création d’une commission consultative des recherches médicales et pharmaceutiques
  Présidence de la République, République du Sénégal - (pdf, 8.85 KB)
Key milestones towards a National Health Research System (NHRS)

- **Late 1960s** - The newly independent State assumes national science
  - Creation of the Inter-ministerial Council for Scientific Research and an Office for Scientific and Technical Affairs – with UNESCO’s support
  - Creation of Ministry for Scientific and Technical Research.

- **Late 1970s** - Health Research, specific task under the MOH
  - Creation of the Directorate for Research, Planning and Training within the MOH. Its aim: research coordination, management and advocacy. Three offices were created: Office for Medical Research; Office for Pharmaceutical and Office for Nursing Care.
  - Abolition of the Directorate. The Research Department remains and acquires new and a wide scope of function including development of national programme for research and mechanisms for coordinating research and definition of research priorities.

- **Late 1990s and current 2000s** – foundations of a National Health Research System
  - Reshuffle of MOH and creation of a new Department for Studies, Research and Training. Its aim: to provide technical support for government departments, and across the health pyramid
National Priorities for Health Research

Research licensing and clearance process

Map description

Tanzania’s local IRECs review protocols from Tanzanian researchers (1a) before being submitted to NIMR for clearance (2). IRECs may also review research proposals involving foreign researchers or collaborators (1b). Proposals submitted by foreign researchers may be directly reviewed by NIMR (1c). Scientific and ethical clearance is granted by NHREC, the operating subcommittee of MRCC which is NIMR’s medical research coordinating committee. Once MRCC/NHREC judges the research to be scientifically and ethically sound, it grants a certificate (3). Copies are sent to the Chief Medical Officer of the Ministry of Health and Social Welfare (4) and to the Director General of COSTECH (5). COSTECH is charged with separately granting research licenses to national and foreign investigators, for what a scientific and research clearance certificate is required (6 -7). Clinical trials must be registered with the Tanzania Food and Drug Authority. For a clinical trial certificate to be issued, the research proposal must have obtained an ethical clearance certificate issued by any approved institute for medical research and a research permit issued by COSTECH (8-10).

Research licensing

The Tanzania Commission for Science and Technology (COSTECH) is the government organ in charge of research licensing, as stated by Government Circular MPEC/B/10/1 of 4th May 1980, issued by the Ministry of Planning and Economic Affairs. In this regard, research is defined as all activities that involve the gathering of information that enables one to have an understanding of phenomena.

All individuals and institutions who wish to carry out research on the mainland of Tanzania need to seek research licensing from COSTECH – research licensing in Zanzibar is granted through the office of the Zanzibar Chief Minister. Research licensing is expected to apply for all foreign researchers; all Tanzanians studying abroad and in need of doing research in the country; all Tanzanians, except students, from institutions of higher learning and from affiliated research institutions or government ministries who are required to do research as part of
## Research Financing and Partnerships

### Health and Health Research Budget - Best estimates of internal funding in Burkina Faso

<table>
<thead>

<th>Comments</th>
</tr>
</thead>
</table>
| 1999-2000 | 407.9 billion CFA* (88.65 million USD) | 0.43%* | 17 billion CFA* (36 million USD) | In June 2007, a new line for health research called “fond d’appui pour la recherche santé” (FARES) was approved in the Ministry of Health budget. The funding level should be approximately 40 million CFAF (62 000 USD) and should be allocated to:  
- Support projects that are in line with the national health research priorities  
- Strengthen the coordination of health research at the national level  
- Capacity development  
(Source: Donor Alignment and Harmonization in relation to National Health Research Priorities Study (AHLA Study), COHRED, 2007, p 17) |

* The Commission on Health Research for Development recommended in 1990 that countries should spend 2% of their national health expenditures in health research.

Request for the 'Institutional Representative Access' for Health Research Web

Institutional information on Health Research Web (HRWeb) can be entered, modified and kept up to date only by the institution concerned. This form allows you to request authorisation to access and change information in HRWeb on behalf of an institution. We encourage each institution to register more than one representative to ensure continuity. Each potential representative needs to complete this form separately. A maximum of three representatives per institution can be registered. To complete this request, the institution needs to confirm to Health Research Web that the applicant is authorised to act on behalf of the institution.

The registration process is simple:
- the applicant ('user') must first create a user account in HRWeb (simply 'log in' and follow instructions);
- the applicant ('user') completes this request form, agreeing to the terms and conditions for use of HRWeb (see below);
- the applicant ('user') then sends a letter of authorization by the institution on the official letterhead of the institution to HRWeb. This form has to be signed by a person authorized to sign such authorisations on behalf the institution, designating the applicant as a representative responsible for institutional information to be placed on HRWeb. (This letter can be sent as hard copy, by fax or as a scanned letter).
- Once this letter is received, the user account of the applicant will be modified by HRWeb to allow access to institutional information.

Dear David, Can you delete for Syria, the Ministry of Research, Science & Technology. I found that the web address is not correct. I will try to find the address if any and send it to you. Best regards Hassen

Hi Hassan, Thanks for this! I will take the link out for now and keep the Ministry. Do you think this is ok? Best regards, David
