

Climate Change Adaptation Research in Asia

Regional Workshop and Synthesis

June 19-20, Kathmandu

Objectives

Regional workshop, Kathmandu, June 19-20, 2013:

- To bring partners in South, SE Asia and China together to share and learn from results – both final and emerging results from 20 projects
- To enable researchers to engage on methods and approaches to research on climate adaptation
- To facilitate opportunities for collaboration, networking at a regional level – strengthen ability to communicate research, and influence policy

Expected outputs

- Research abstracts and presentations
- Summary report of workshop proceedings
- Media coverage, blogs, video clips, etc.
- Analytical synthesis report outlining key insights, emerging lessons, opportunities and challenges for research on climate adaptation
- Journal pieces, short, op-ed, e.g. *Current Opinions in Environmental Sustainability*
- Facilitate communities of practice, learning alliances – AdaptAsia@com?
