OER IN AND AS MOOCS: IMPACT ON EDUCATORS’ PRACTICES IN AFRICAN-DEVELOPED HIGHER EDUCATION COURSES

Walji, S.;

IDRC Grant/ Subvention du CRDI: 107311-001-Research into Open Educational Resources for Development
OER in and as MOOCs: impact on educators’ practices in African-developed higher education courses

ABOUT THE UCT MOOCS PROJECT

- First major MOOC initiative in Africa
- 12 MOOCS+ over 3 years
- Multi-platform approach
- Intention for OER outputs
- Creative commons licensed material

Medicine and the Arts: Humanising Healthcare

What is a Mind?
RATIONAL FOR THIS IMPACT STUDY

Grantee of Research on Open Educational Resources for Development (ROER4D) Impact Studies call (sub-project 10.3)

Q: In what ways, and under what circumstances can OER adoption impact upon the increasing demand for accessible, relevant, high-quality, and affordable education in the Global South?

"The most obvious dimension of openness in a MOOC is the sharing of OER, but it is important to recognise that the facilitators, by participating in this network of interactions, open their instruction as well” (Stephen Downes)

**ROER4D research: OER adoption & impact**

Research on Open Educational Resources for Development in the Global South

**General Objective:**
Improve educational policy, practice and research in developing countries by better understanding the use and impact of OER.

**Project Clusters:**
- OER Desktop Review
- OER Survey
- Academics’ adoption of OER
- Teacher educators’ adoption of OER
- OER adoption in one country
- OER impact studies
- Baseline educational expenditure

August 2013 - February 2017

[twitter.com/roer4d](http://twitter.com/roer4d)
Why is this research useful?

- Add to body of evidence about impact on educators of adopting OER
- Opportunity to examine what the ‘open’ in MOOCs means – contested space
- What does the MOOC as a format add to adoption and creation of OER?
- Inform institutions thinking of offering MOOCs esp. in Global South
Main research question:
How does the adoption (or not) of OER, incorporating both creation and use, in African-developed MOOCs impact on educators’ (primarily creators, but may also include re-users) open educational practices?

Hypothesis: OER adoption in a MOOC format contributes to the spread of open educational practices or a transformation in educators’ teaching and learning practices.
Which educators

Primary:
Academic conveners

Secondary:
other educators in institution
educators enrolled in MOOC
RESEARCH METHODOLOGY & EVIDENCE

Track educators’ attitudes and self-reported practices before, during MOOC production, after running of MOOC and later (interviews, focus group and observations)

Develop Activity Systems for each MOOC site in disciplinary and institutional contexts for rich understanding

Examine artefacts produced (policy documents, materials, MOOC discussions, MOOC proposals, course material, responses to learning analytics)

Track examples of transformed and open practices later and across sites (observation and interviews)
FRAMEWORK FOR ANALYSIS

**Subject:**
Educators (wanting to teach new courses in new ways)

**Tools:**
- OER; MOOC platforms;
- Creative Commons' licences; pedagogical strategies

**Object:**
- new courses and learning opportunities
- Expanded learning opportunities and open educational practices (OEP)

**Rules:**
- Supporting open environment at UCT;
- Academics' teaching commitments;
- Academics reward structures;
- Content licensing requirements; MOOC platform requirements;
- Institutional IP requirements;
- Contractual obligations between UCT and MOOC platforms; UCT MOOC strategy; MOOCs marketing requirements;
- Research ethics

**Community:**
- Faculty Management; Academics;
- Academic assistants; MOOC Reference group; MOOC Advisory Committee; MOOC Implementation team; MOOC participants;
- UCT Communications & Marketing;
- Other faculty members; Other university academics; Open Education community; MOOCs community

**Division of labour:**
- including: Academics;
- Academic assistants;
- Learning Designers; Project Managers; Video producers, film and crew;
- MOOC Advisory Committee;
- IP lawyer, Contracts office;
- Registrar; MOOC platform staff
FRAMEWORK FOR ANALYSIS

open (learning & teaching) practices
 qualities of open (learning) content

- opening up content to students not on campus/formally enrolled
- sharing and collaborating on content with other practitioners
- re-using content in teaching contexts
- using or encouraging other to use open content
- making knowledge publicly accessible
- teaching/learning in open networks

- openly licensed
- highly discoverable, freely available
- open platform, technically repurposable
- high value production (e.g., multimedia)
- accessible design
- educational purpose/designed for learning
- quality assured/reviewed
- trusted provenance/brand

PRELIMINARY FINDING #1

MOOCs are forcing academics and learning design team to confront issues about open access & OER
- Nascent understanding of OER, open licencing
- Find CC licenced images and source readings & alternative texts
- Put own work into open repository to enable use in MOOC
- Viral effect of understanding openness

Reusing OER “as is” can be problematic

- e.g. OER from Wellcome Trust format unreadable even though taken “as is” due to fixed PDF format. Technical openness may be a challenge

Legal openness may not be enough and recontextualisation is required.

- e.g. Open Content sometimes ambiguous as to provenance

You can see immediate problems with an OER in a MOOC – participants tell you!
Preliminary finding #3

Releasing materials as OER is legally possible in the MOOC platforms we work with:

- It is up to institution, not platform to specify the licence
- But it can be technically complicated – how do we release quizzes or assignments from MOOC platform. Should we?
- How do we mix licences?
- Should we store MOOC materials in an Open repository?

Further readings can be found in this list of resources or below under the heading 'see also'.

UCT is committed to encouraging open access with regard to scholarly communication and education. Where possible we have released our course content under a Creative Commons licence.

Clear commitment to open licensing in UCT MOOCs
Signs of transformation of attitudes to open and online education

- Marked change in educators’ attitude to open courses and teaching online and open
- Early re-use of MOOC materials in face to face course

I am also so impressed with the work you are all doing in providing reading material. I would like to say a special thank you to Misha Murphy for reminding me about the ethnography, ‘The Private Worlds of Dying Children’ by medical anthropologist Myra Bluebond-Langner. I quote her, “It was written in 1978 in the United States and is about children dying from leukemia. The stories she provides are very similar to the ones mentioned by Kate. It really shows that children understand a lot more about their illness than adults think they do.” This is an absolute classic that I will add to our reading list in our future courses in 2016.

(Extract from weekly email from Lead Educator)
Conclusion

While there is evidently some immediate impact on educators’ practices as a result of making a MOOC, the test will be in ascertaining contribution of OER to longer term attitudes and practices.
